# MULTIPLE PULL REQUESTS

## Fixed and updated documentation and GitHub Pages

#240 by lucagiove was merged on Sep 25, 2019

## Retry status all commits ●

#237 by lucagiove was merged on Sep 26, 2019

8

## Retry request in case of specific http statuses (eg 502) ●

#236 by lucagiove was merged on Sep 14, 2019

2

## Log refactor ✖

#235 by lucagiove was merged on Sep 26, 2019

## Fix header case ●

#228 by lucagiove was merged on Sep 26, 2019

## Remove duplicated code (conflict solved and PR review) ●

#227 by lucagiove was merged on Sep 26, 2019

2

## Session exists ✖

#226 by lucagiove was merged on Sep 26, 2019

1

## Fix Travis CI to work with latest RobotFramework ●

#225 by lucagiove was merged on Sep 26, 2019

        http_error_msg = u'%s Client Error: %s for url: %s' % (self.status_code, reason, self.url)

    elif 500 <= self.status_code < 600:
        http_error_msg = u'%s Server Error: %s for url: %s' % (self.status_code, reason, self.url)

    if http_error_msg:
        raise HTTPError(http_error_msg, response=self)
```

# BEST PRACTICES AND COMMON PITFALLS

- Embed requests in nested keywords

[see an example](#)

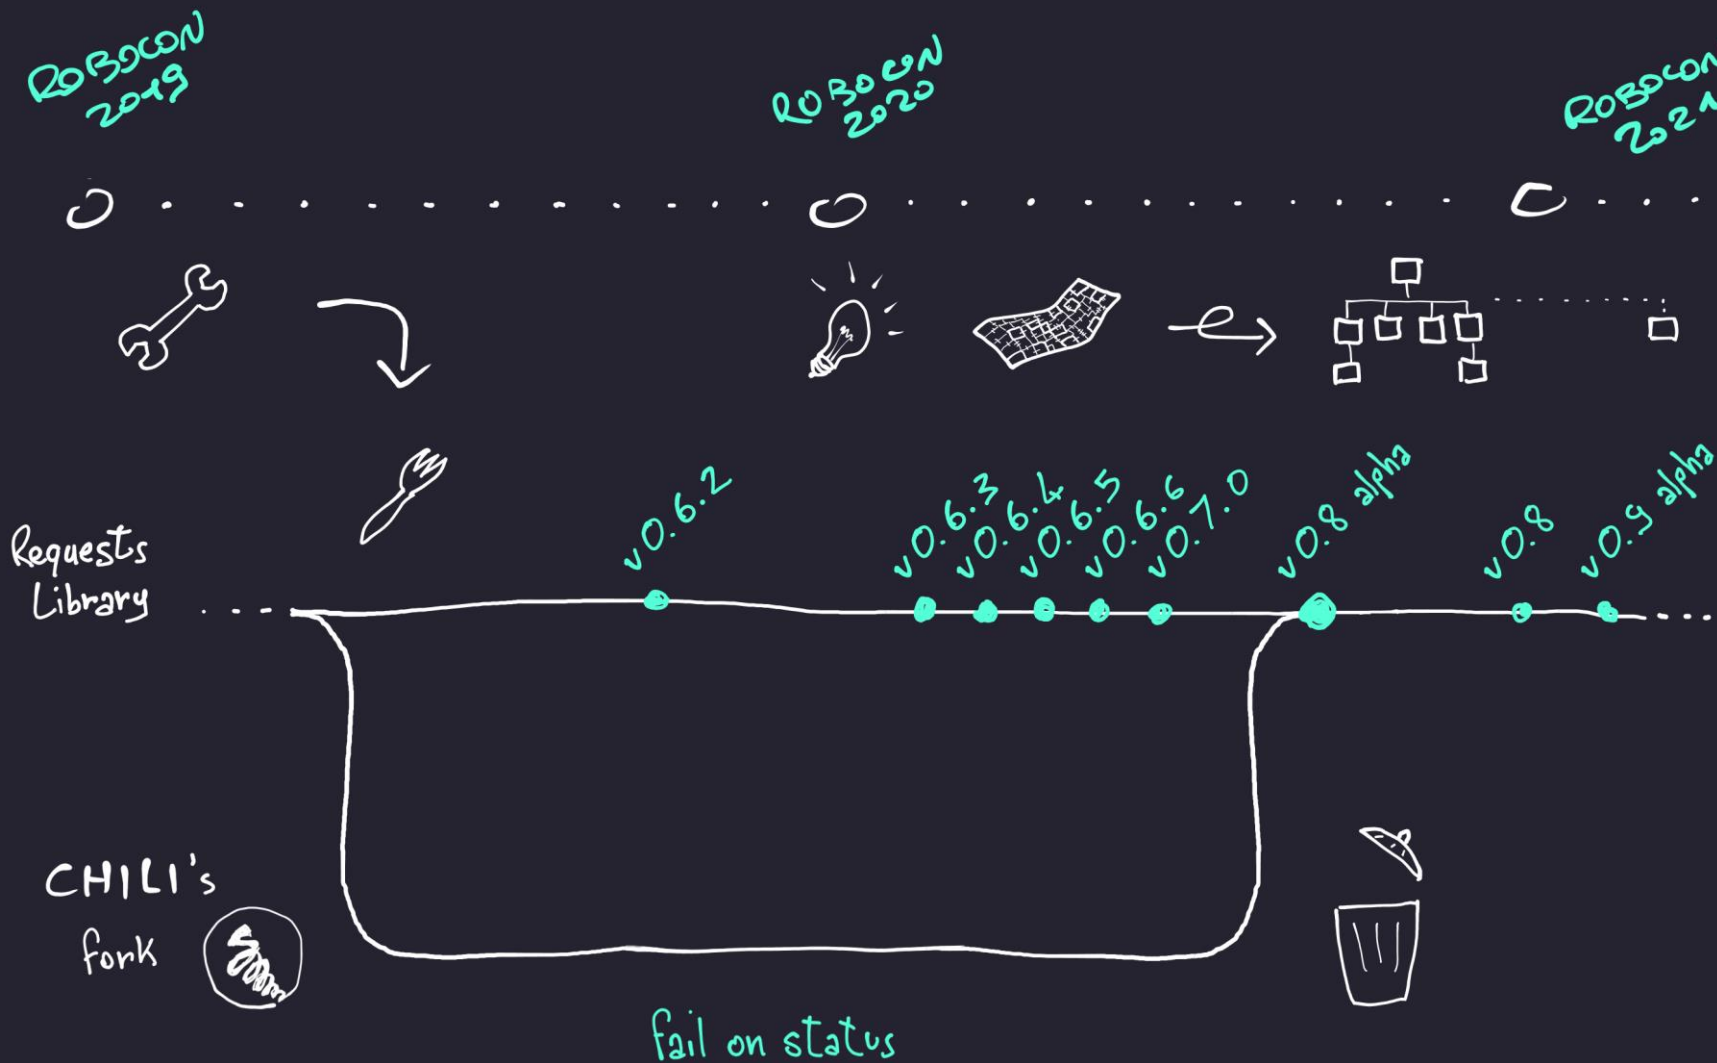

- Positional url with = symbol (ex. /endpoint?sort=asc) will fail because of RobotFramework handling with kwargs\*\*

- String as arguments or missing spaces
